

6509250 BELLOWS INSTRUCTION SHEET

The replacement Bellows may differ slightly from the Bellows originally installed on your equipment. The two changes are the integrated Bellows Cover Brackets and the Velcro® Fastening System.

Mounting Instructions:

1. Remove the fasteners and discard the old Bellows and Bellows Cover Brackets on each end.
2. Fasten the new Bellows with the same fasteners or use the Velcro® installed on the Bellows. If you do not wish to use the Velcro®, simply remove it from the end of the Bellows and use the original fasteners to mount the Bellows.
3. Before applying the Velcro®, use alcohol on a clean cloth to remove any grit, dust, and oily residue from the metal surfaces near the Bellows' attachment areas. Dry the metal surfaces.
4. Trim the Velcro® to fit around the screws that fasten the End Bracket to the Carriage.
5. Remove the white backing tape from the Velcro® and firmly press one end of the Bellows to the Bracket mounted on the Carriage and the other end to the Fixed Traverse Base End Bracket.
