**Create New Beds - Maintain Existing Beds - Cart Path Edging
Sidewalk Edging - Pet Fence Trenches, etc.**

The Salsco, Bed-Definer!

Unit pictured has the *V-GROOVE* blade attachment installed. The *SOD-BUSTER* blade option is used in conjunction with the standard *DISH* type blade to break up the sod. Also available is the *STRAIGHT EDGE* blade for narrow trench work. Need a special blade for a special job? Ask us, we can most likely make it for you.

Standard with the Bed Definer is the dish type edging blade, used to redefine existing beds. *13 HP HONDA* engine with oil alert and hydrostatic forward/reverse means ease of operation and dependability. Maneuverability, along with a tight turning radius, make this a user friendly machine!

Tight corners, going around trees or hydrants is never a problem. *HYDROSTATIC DRIVE*, and *TRACTOR STYLE TRANS AXLE*, provide traction and ease of control under all types of conditions and terrain.

*BED DEFINER
ATTACHMENTS*

Versatile cutter head *PIVOTS* to define beds or can also be used for straight edging.

Optional V-Groove trencher blade cuts to *DEPTHS OF UP TO 9"*. Specially designed for new beds or trench work.

OPTIONAL BRUSH MOWER deck is interchangeable with the Bed Definer head by removing six bolts and installing the Brush Mower deck. Built tough, the Salsco Brush Buster, commercial mower has a cutting width of 30", a cutter height of 4", and will cut down anything it can knock down.

Built tough for many years of dependable, virtually maintenance free service

COMMERCIAL SWEEPER

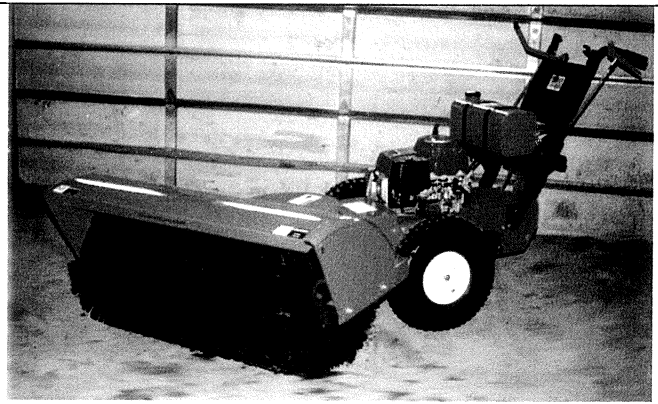

**PARKING LOTS – CONSTRUCTION SITES – SIDEWALKS – ETC.
SNOW – DEBRIS – GRAVEL- SAND – DETHATCHING GRASS
HEAVY DUTY DESIGN FOR COMMERCIAL USE!**

The variable speed single handle allows the operator to slow the transport speed down to allow the broom to clean packed mud, deep snow and heavy gravel or sand. By simply squeezing the handle, the ground speed increases to do lighter sweeping jobs. Just squeeze the left handle to activate the reverse variable speed.

**Available in 3' and 4' Broom Head x 24" Diameter
4 Pivot Positions – 1 Straight Position
Pivots 15° & 30° Left or Right of Center
Gauge Wheels for Use on Grass**

The Multi-Driver has a full belly pan to protect all inner workings of the machine. The 13hp Honda engine's pressurized oil system lubricates the engine while working on inclines. The Multi-Driver is built Salsco Tough with a variable speed hydrostatic transaxle, double B-Section belts, cast iron pulleys with taper lock centers, heavy-duty pillow block bearings, adjustable height handles and a neutral safety switch.

Other attachments currently available for use with the Salsco Multi-Driver include a 32" cut BRUSH MOWER and BED DEFINER with deep cutting ability.
